SUPPORT INFORMATION

CD-ROM Contents

This CD_ROM contains many of the faculty presentations from the December 2003 International Health Summit, held in Miami Florida. The CD-ROM also includes various navigation menus and support files. The majority of the presentations are provided in Microsoft PowerPoint format. A few of the presentations, as well as all of the menus are provided in Adobe Acrobat format. A video clip file is also included.

System Requirements

In order to properly use this CD-ROM, your system will require the following:

- Adobe Acrobat Reader version 5.0 or higher (version 6.0 recommended)
- Microsoft PowerPoint 2000 or higher
- Current compatible media player and speakers to view the Video Clip file
- Microsoft Windows™ 98 or higher
- IBM compatible Pentium class with CD-ROM drive

Viewer Downloads

- Should you require a free current version of the adobe acrobat reader, go to: <http://www.adobe.com/products/acrobat/readstep2.html>
- Should you require a free current version of the Microsoft PowerPoint viewer, go to: <http://www.microsoft.com/downloads/details.aspx?FamilyID=428d5727-43ab-4f24-90b7-a94784af71a4&displaylang=en>
- Should you require a free current version of a Windows Media player to view video clips, go to: <http://www.microsoft.com/windows/windowsmedia/download/>

Use And Installation

To use the CD-ROM, simply open menu.pdf from the CD-ROM, which will access all other menus and presentation files directly from the CD-ROM.

Due to the large total file size of the CD-ROM (244 MB) no installation program has been provided, as most users would not desire to consumer that amount of space on their hard disk drive. However, should you wish to install the CD-ROM files to your computer, you can do so by:

1. Using Windows Explorer, create a new folder in your desired location (File, New Folder in the top menu) and rename the folder whatever you wish
2. Using Windows Explorer, select your CD-ROM drive, select all files and copy them to the above new folder
3. Using Windows Explorer, select the menu.pdf file in the above new folder, right click your mouse and select Create Shortcut. This will place an icon to open the main menu in your desktop.

Navigating through the presentations

From the main menu, you can select from four alternative menus to access any of the Summit presentations:

- *Agenda Menu:* You can link to applicable presentations in order of their presentation from the Miami Summit agenda
- *Presentations Menu:* You can link to applicable presentations in alphabetical order by their title.
- *Countries Menu:* You can link to applicable presentations in order by the country of the faculty presenter.
- *Faculty Menu:* You can link to applicable presentations in order by the name of the faculty presenter.

When you click a link to Microsoft PowerPoint presentation, a message may appear stating the application powerpnt.exe is set to be launched by this pdf file. You should click the "Open" button in order to proceed with opening the presentation file.

If you do not wish to use the menu files provided, you can of course directly open the presentation files from Microsoft PowerPoint or Adobe Acrobat. The last name of the faculty presenter is included in each presentation file name, in the format: pres_lastname03.ppt or pres_lastname03.pdf

Video Clip

A video clip file has been included to supplement one of the presentations. [Click here](#) to go to the video launch page, which included additional technical support information on viewing the video clip.
